JOURNAL OF ELECTRON SPECTROSCOPY and Related Phenomena

Subject index

Accuracy
Implementation of an efficient analytical approximation to the Voigt function for photoemission lineshape analysis 125
Adsorbate
Core hole screening mechanism of adsorbates 225
Adsorption
A theoretical study of the adsorption dynamics of hydrogen on Ni(111) surface 55
Ab initio and semiempirical cluster studies on the reactivity of the vanadium pentoxide (010) surface 89
Ab initio calculations for the adsorption of small molecules on metal oxide surfaces. Part 3. Adsorption of H and CH_3 radicals on NiO(100) 99
Adsorption of small molecules on metal oxides 43
Density functional approach to moderately large cluster embedding for infinite metal substrates 31
Reaction of CH_4 and CH_3F with Si(111) 23
AES
Polymer analysis by Auger electron spectroscopy using sectioning and cryogenic cooling 141
Approximation
Implementation of an efficient analytical approximation to the Voigt function for photoemission lineshape analysis 125
Auger
A method to determine a transmission correction for electron spectrometers using synchrotron radiation 181
Polymer analysis by Auger electron spectroscopy using sectioning and cryogenic cooling 141

Bifuran
He II photoelectron spectra of bifurans and thienylfurans 177
Binding energy
Ab initio calculations for the adsorption of small molecules on metal oxide surfaces. Part 3. Adsorption of H and CH_3 radicals on NiO(100) 99

CASSCF
Adsorption of small molecules on metal oxides 43
Carbon monoxide
CO adsorption on the (001) surface of MgO: a comparison of Hartree–Fock and local density functional results 13
Carborane
Photoemission from gaseous and condensed molecular carborane cluster molecules 111
Charge transfer
Effective atomic charges and charge transfer after photoionization in sulfur compounds and phosphorus compounds 149
CI
Ab initio CI investigation of valence photoelectron spectra of conjugated hydrocarbons 207
Cluster
A theoretical study of the adsorption dynamics of hydrogen on Ni(111) surface 55
Ab initio calculations for the adsorption of small molecules on metal oxide surfaces. Part 3. Adsorption of H and CH_3 radicals on NiO(100) 99
Adsorption of small molecules on metal oxides 43
CO adsorption on the (001) surface of MgO: a comparison of Hartree–Fock and local density functional results 13
Density functional approach to moderately large cluster embedding for infinite metal substrates 31
Embedded-cluster and super-cell treatment of charged defects in crystals 1
Inner and valence shell photoelectron spectra calculated by the density functional method 81
Photoemission from gaseous and condensed molecular carborane cluster molecules 111
Reaction of CH_4 and CH_3F with Si(111) 23
The lower excited states of a Cu^+ impurity in NaF: localized or not? 73
Valence bond reading of ab initio molecular orbital cluster model wavefunctions: the nature of chemical bond in corundum 65
Condensed phase
Photoemission from gaseous and condensed molecular carborane cluster molecules 111

Configuration interaction
Ab initio CI investigation of valence photoelectron spectra of conjugated hydrocarbons 207
Conical system
Quasi-conical energy analyzers for electron spectroscopy 159
Copper
The lower excited states of a Cu^+ impurity in NaF: localized or not? 73
Core
LCAO density functional calculations of core binding energy shifts of large molecules 197
Core hole
Core hole screening mechanism of adsorbates 225
High resolution studies of the electronic decay of core holes in molecules: there is no threshold at the "XPS threshold" 239
Corundum
Valence bond reading of ab initio molecular orbital cluster model wavefunctions: the nature of chemical bond in corundum 65
Cryogenic cooling
Polymer analysis by Auger electron spectroscopy using sectioning and cryogenic cooling 141
Cu(110)
Formation of ultrathin films of iron oxide on Cu(110) 133

DF
Density functional approach to moderately large cluster embedding for infinite metal substrates 31
Inner and valence shell photoelectron spectra calculated by the density functional method 81

EARE
Effective atomic charges and charge transfer after photoionization in sulfur compounds and phosphorus compounds 149
Effective atomic charge
Effective atomic charges and charge transfer after photoionization in sulfur compounds and phosphorus compounds 149
Electron spectrometer
A method to determine a transmission correction for electron spectrometers using synchrotron radiation 181
Embedded cluster
Embedded-cluster and super-cell treatment of charged defects in crystals 1
Embedding
Ab initio calculations for the adsorption of small molecules on metal oxide surfaces. Part 3. Adsorption of H and CH_3 radicals on NiO(100) 99
Adsorption of small molecules on metal oxides 43
Density functional approach to moderately large cluster embedding for infinite metal substrates 31
Embedded-cluster and super-cell treatment of charged defects in crystals 1
The lower excited states of a Cu^+ impurity in NaF: localized or not? 73
Equipment
Design of a 90 degree spherical deflection analyzer 189
Ethanal
Full geometry optimizations of core ionized species and their equivalent core ions: an ab initio study of energies, geometries, charges and vibrational frequencies 117

Flood gun
Surface analysis of wide gap insulators with XPS 245
Fluoromethane
Reaction of CH_4 and CH_3F with Si(111) 23
Fringe field
Design of a 90 degree spherical deflection analyzer 189
Furan
Resonant dissociative attachment of electrons to molecules of five-membered heterocyclic compounds and lactams 165

Gas
Photoemission from gaseous and condensed molecular carborane cluster molecules 111
Geometry optimization
Full geometry optimizations of core ionized species and their equivalent core ions: an ab initio study of energies, geometries, charges and vibrational frequencies 117

Hartree–Fock
Ab initio and semiempirical cluster studies on the reactivity of the vanadium pentoxide (010) surface 89
CO adsorption on the (001) surface of MgO: a comparison of Hartree–Fock and local density functional results 13
Embedded-cluster and super-cell treatment of charged defects in crystals 1
HF
Full geometry optimizations of core ionized species and their equivalent core ions: an ab initio study of energies, geometries, charges and vibrational frequencies 117
Hydrocarbon
Ab initio CI investigation of valence photoelectron spectra of conjugated hydrocarbons 207

Hydrogen
A theoretical study of the adsorption dynamics of hydrogen on Ni(111) surface 55
INDO
Ab initio and semiempirical cluster studies on the reactivity of the vanadium pentoxide (010) surface 89
Instrument
Design of a 90 degree spherical deflection analyzer 189
Insulator
Surface analysis of wide gap insulators with XPS 245
Iron oxide
Formation of ultrathin films of iron oxide on Cu(110) 133
Isomer
He II photoelectron spectra of bifurans and thienylfurans 177

Lactam
Resonant dissociative attachment of electrons to molecules of five-membered heterocyclic compounds and lactams 165
LCAO-DF
LCAO density functional calculations of core binding energy shifts of large molecules 197
LCGTO-LSD
Inner and valence shell photoelectron spectra calculated by the density functional method 81
LCGTO-NLSD
Inner and valence shell photoelectron spectra calculated by the density functional method 81
LEED
Formation of ultrathin films of iron oxide on Cu(110) 133
Lineshape analysis
Implementation of an efficient analytical approximation to the Voigt function for photoemission lineshape analysis 125
Local density function
CO adsorption on the (001) surface of MgO: a comparison of Hartree–Fock and local density functional results 13
Localization
The lower excited states of a Cu^+ impurity in NaF: localized or not? 73

Magnesium oxide
CO adsorption on the (001) surface of MgO: a comparison of Hartree–Fock and local density functional results 13
Embedded-cluster and super-cell treatment of charged defects in crystals 1

Methane
Reaction of CH_4 and CH_3F with Si(111) 23
MLEC
Density functional approach to moderately large cluster embedding for infinite metal substrates 31
MNDO
Photoemission from gaseous and condensed molecular carborane cluster molecules 111
Resonant dissociative attachment of electrons to molecules of five-membered heterocyclic compounds and lactams 165
Model
Effective atomic charges and charge transfer after photoionization in sulfur compounds and phosphorus compounds 149
The lower excited states of a Cu^+ impurity in NaF: localized or not? 73
MRCI
Valence bond reading of ab initio molecular orbital cluster model wavefunctions: the nature of chemical bond in corundum 65

Nickel
A theoretical study of the adsorption dynamics of hydrogen on Ni(111) surface 55
Nickel oxide
Ab initio calculations for the adsorption of small molecules on metal oxide surfaces. Part 3. Adsorption of H and CH_3 radicals on NiO(100) 99
Ni(100)
Core hole screening mechanism of adsorbates 225
Ni(111)
A theoretical study of the adsorption dynamics of hydrogen on Ni(111) surface 55
NMR
He II photoelectron spectra of bifurans and thienylfurans 177
Novel
Design of a 90 degree spherical deflection analyzer 189
Implementation of an efficient analytical approximation to the Voigt function for photoemission lineshape analysis 125

Oxidation
Ab initio and semiempirical cluster studies on the reactivity of the vanadium pentoxide (010) surface 89
Oxide
Ab initio and semiempirical cluster studies on the reactivity of the vanadium pentoxide (010) surface 89
Ab initio calculations for the adsorption of small molecules on metal oxide surfaces. Part 3. Adsorption of H and CH_3 radicals on NiO(100) 99

Adsorption of small molecules on metal oxides 43
Surface analysis of wide gap insulators with XPS 245
PAN
Polymer analysis by Auger electron spectroscopy using sectioning and cryogenic cooling 141
PC
Implementation of an efficient analytical approximation to the Voigt function for photoemission lineshape analysis 125
PES
Ab initio CI investigation of valence photoelectron spectra of conjugated hydrocarbons 207
HE II photoelectron spectra of bifurans and thienylfurans 177
LCAO density functional calculations of core binding energy shifts of large molecules 197
Photoemission from gaseous and condensed molecular carborane cluster molecules 111
Resonant dissociative attachment of electrons to molecules of five-membered heterocyclic compounds and lactams 165
Phosphorus compound
Effective atomic charges and charge transfer after photoionization in sulfur compounds and phosphorus compounds 149
Polymer
Polymer analysis by Auger electron spectroscopy using sectioning and cryogenic cooling 141

Quasi-conical system
Quasi-conical energy analyzers for electron spectroscopy 159

RDEA
Resonant dissociative attachment of electrons to molecules of five-membered heterocyclic compounds and lactams 165
Resolution
High resolution studies of the electronic decay of core holes in molecules: there is no threshold at the "XPS threshold" 239

SCF
Adsorption of small molecules on metal oxides 43
Density functional approach to moderately large cluster embedding for infinite metal substrates 31
Full geometry optimizations of core ionized species and their equivalent core ions: an ab initio study of energies, geometries, charges and vibrational frequencies 117
Valence bond reading of ab initio molecular orbital cluster model wavefunctions: the nature of chemical bond in corundum 65
SDA-90
Design of a 90 degree spherical deflection analyzer 189
Selenophene
Resonant dissociative attachment of electrons to molecules of five-membered heterocyclic compounds and lactams 165
Shake up
Core hole screening mechanism of adsorbates 225
Silicon
Reaction of CH_4 and CH_3F with Si(111) 23
Si(111)
Reaction of CH_4 and CH_3F with Si(111) 23
Sodium fluoride
The lower excited states of a Cu^+ impurity in NaF: localized or not? 73
Sulphur compound
Effective atomic charges and charge transfer after photoionization in sulfur compounds and phosphorus compounds 149
Super cell
Embedded-cluster and super-cell treatment of charged defects in crystals 1
Surface
A theoretical study of the adsorption dynamics of hydrogen on Ni(111) surface 55
CO adsorption on the (001) surface of MgO: a comparison of Hartree–Fock and local density functional results 13
Surface analysis of wide gap insulators with XPS 245
Surface charge
Polymer analysis by Auger electron spectroscopy using sectioning and cryogenic cooling 141

Thienylfuran
He II photoelectron spectra of bifurans and thienylfurans 177
Thin film
Formation of ultrathin films of iron oxide on Cu(110) 133
Threshold
High resolution studies of the electronic decay of core holes in molecules: there is no threshold at the "XPS threshold" 239
Transmission correction
A method to determine a transmission correction for electron spectrometers using synchrotron radiation 181
Two-body problem
Valence bond reading of ab initio molecular orbital cluster model wavefunctions: the nature of chemical bond in corundum 65

Ultrathin film
Formation of ultrathin films of iron oxide on Cu(110) 133
UPS
He II photoelectron spectra of bifurans and thienylfurans 177
Inner and valence shell photoelectron spectra calculated by the density functional method 81

Vanadium oxide
Ab initio and semiempirical cluster studies on the reactivity of the vanadium pentoxide (010) surface 89
Voigt
Implementation of an efficient analytical approximation to the Voigt function for photoemission lineshape analysis 125

Wide gap insulator
Surface analysis of wide gap insulators with XPS 245

XAS
Core hole screening mechanism of adsorbates 225
XPS
Core hole screening mechanism of adsorbates 225
Formation of ultrathin films of iron oxide on Cu(110) 133
High resolution studies of the electronic decay of core holes in molecules: there is no threshold at the "XPS threshold" 239
Inner and valence shell photoelectron spectra calculated by the density functional method 81
Surface analysis of wide gap insulators with XPS 245
